Packed 1 set of toys to box, 12 boxes to carton. Weight 32 lbs.

THE Hubley Toy Parade presents the outstanding toy values for 1936. Beautiful colors . . . "play feature" construction . . . streamlining that is breath taking in its realism . . . those are the features that make every Hubley Toy a sure winner of the hearts of the children and the dollars of the grown-ups.

Toys That Teach

In response to the demands of both children and parents, an educational play feature is embodied in every Hubley Toy wherever possible. The Steam Shovels actually raise and lower their load . . . the Dump Trucks really dump . . . many of the cars may be taken apart and re-assembled because of a patented construction feature. Modern parents are keen students of child psychology, and are coming more and more to insist upon

toys that really work and do things . . . toys that will teach.

"Exclusive Rights"

Many of the toys listed here are made only by us, under an "exclusive right" arrangement with the manufacturer of the machine from which the toy is copied. They are as nearly perfect copies of the real thing as it is possible to make.

Made to Sell

Hubley Toys are made to sell. They are designed and finished to appeal to children and parents. They are produced in large quantities in a modern factory and can therefore be priced right. The accurate details, beautiful and permanent colors, the novel "play" features, and the sturdy strength of Hubley Toys assures them a prominent place on the counters of any toy store or toy department.

THE HUBLEY MANUFACTURING COMPANY
LANCASTER, PENNSYLVANIA

Electrical Toys
